MIP: Data Classification Policy & Framework	Data Classification is: The application of sensitivity labels, retention labels, and sensitive information type classification.	M365 Compliance	https://docs.microsoft.com/en-us/microsoft-365/compliance/data-classification-overview?view=o365-worldwide
MIP: trainable classifiers - pre-trained and custom			https://aka.ms/MIPDataClassification
MIP: custom trainable classifier	**Data Classification > Trainable Classifier** **Requires 50 seed files, 200 review items used for:** **-retention auto labeling policies** **-communication compliance policies** **-auto labeling for files and emails for sensitivity labels**	Data Classification	https://docs.microsoft.com/en-us/microsoft-365/compliance/classifier-get-started-with?view=o365-worldwide
Custom Sensitive Information Types	Creating a Custom SIT: Data Classification > Sensitive info types > +Create keywords, regex, or dictionary Confidence Level - eg. 60% Character Proximity - eg. with 50 characters (default 300)	Data Classification	
MIP: sensitive information types	SITs are used by: - DLP - Content Explorer - Label Policies - Communication compliance - Microsoft Information Governance SIT confidence levels: High, medium, low - based on number of supporting elements were found along with the primary element. eg. 60% - primary element Credit card string match - secondary element ANY expiry date - secondary element	Data Classification	link
